

Solutions for Federal Government

The next-generation of open government technology.

Granicus provides comprehensive solutions to help federal agencies, advisory committees, boards, and commissions increase transparency and citizen participation. Over the past 10+ years, we've worked with local and state governments to build a new standard of open government for meetings and records. Today, this standard is proven successful by hundreds of agencies at the local, state, and federal level. It helps engage and inform citizens in effective new ways using the latest technologies—webcasting, cloud computing, and new media. Already, the National Institutes of Health, National Institute of Standards and Technology, National Science Foundation, U.S. Department of Agriculture, the Nuclear Regulatory Commission, and others are taking open government to the next level with Granicus solutions.

Open Platform

The leading webcasting platform for government.

Open your meetings to the public like never before with a webcasting solution designed for government. It's the fastest and easiest way to broadcast public meetings online in a secure environment without making expensive IT investments or infrastructure changes.

- Rely on a secure, world-class cloud infrastructure to deliver unparalleled webcasting performance.
- Easily capture, manage, and deliver live and archived webcasts through a web-based, automated solution.
- Build a powerful web portal of archived videos on your website.
- Optimize video quality, speed, and reliability with unlimited bandwidth, permanent storage, and intelligent routing.
- Leverage a fully managed solution complete with proactive systems monitoring and support 24/7.

Government Transparency Suite

Keep citizens engaged with convenient access.

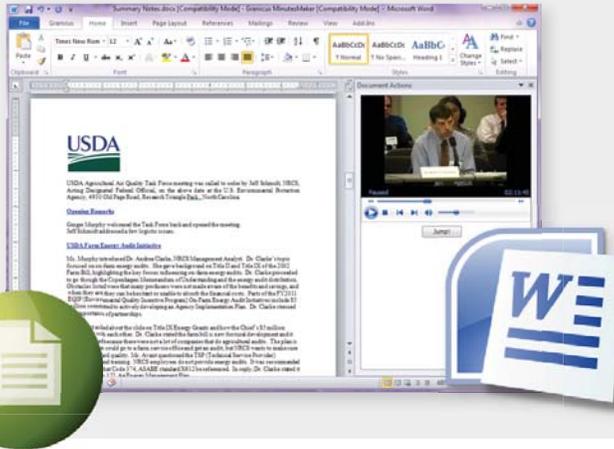

Make your video and data even more compelling and accessible. Now, citizens and staff can easily follow your meetings and research topics that interest them most—from anywhere, at anytime.

- Empower audiences to search your video and integrated documents by full text and spoken word.
- Reach the broadest possible audience by connecting videos to smart phones and other mobile devices.
- Achieve ADA Section 508 compliance with closed captioning and the most accessible data formats.
- Analyze viewership trends through a reporting dashboard with graphics and advanced filters.
- Deliver a better user experience with video-linked documents and RSS subscription by keyword, document, or video.

Meeting Efficiency Suite

Make your meeting minutes more useful to the public.

Modernize traditional minutes formats with video and digital recording. Easily produce an advanced minutes record that links the actions and decisions of a meeting directly to the recorded video. Plus, save time through automated software or our full service option.

- Promote a more modern, useful, and video-enhanced minutes record across your committees.
- Maximize FACA and FOIA open government compliance with transcripts, audio, video, and automated publishing.
- Simplify minutes creation through a digital workflow that's compatible with Microsoft Word.
- Leverage a full service option—Granicus will finalize and publish your minutes in the format of your choice.
- Produce a complete, word for word transcript and give the public a written account of your meeting.

Citizen Participation Suite

Productively involve citizens in meetings online.

Give citizens an easy way to participate in meetings online without increasing your workload. Quickly gather citizen feedback on agenda-item issues through a convenient web-form and automated process. This helps generate higher quality citizen input which can lead to better decisions and policy outcomes.

- Encourage productive citizen participation online through a seamless integration with your open meeting process.
- Conveniently collect, consolidate, and route citizen feedback on meeting agenda items through the web.
- Control the timing and topics for public comments to ensure feedback is relevant and actionable.
- Measure public opinion and deliver a comprehensive report.
- Retain comments in your public record without hassle or complexity.

Granicus' award-winning solutions portfolio enhances government transparency, participation, and collaboration.

The National Institutes of Health, National Institute of Standards and Technology, National Science Foundation, U.S. Department of Agriculture, and the Nuclear Regulatory Commission are already applying Granicus' next-generation technologies to align themselves with President Obama's Open Government Directive.
