

iCompass

Granicus Certified Partner Connection

iCompass provides CivicWeb, the leading cloud-based Meeting and Records Management Solution for City Clerks who are swamped with never-ending tasks related to managing their meeting process, records administration and tracking responsibilities.

Import Data Types Into Granicus

Meeting Name and Schedule

Agenda Items

Supporting Documents

Agenda Publishing Settings

For organizations with multiple legislative solutions, it is important that data be efficiently transferred between systems to avoid manually duplicating effort from one system to the other. To solve this problem Granicus and iCompass have partnered to save users countless hours of work.

iCompass' CivicWeb™ automates meeting and records management workflow in one system, facilitating open governance through comprehensive and seamless access to information. It provides a real-time pulse and complete visibility into what's going on across the entire organization, and enables the shifting of resources to other pressing priorities. Granicus provides government agencies with streaming media, public meeting management solutions and encourages greater citizen participation in the legislative process.

Improve Workflow with an Integrated Solution

The Granicus-iCompass integration combines CivicWeb and Granicus' streaming media solutions. Organizations can use their preferred solutions to fulfill their needs. This integration allows users to import agenda data types into the Granicus system to improve the day-to-day operations of staff members responsible for agenda and minutes preparation. Staff can create agendas in CivicWeb, import that information into the Granicus system and use Granicus' live meeting management tools to index those agenda items to video.
