

# iLegislate<sup>®</sup> + VoteCast<sup>™</sup>

Real-time meeting voting on the iPad and Android Tablets

iLegislate, our “Chief of Staff in an app”, which has brought meeting research, preparation, and collaboration to the fingertips of staff and elected officials, now functions as a real-time meeting voting tool. By integrating iLegislate with our VoteCast application, effortlessly capture votes and speaker requests live from the convenience of a tablet.

## Meeting Voting Made Easy

*Designed for simplicity, efficiency, and accuracy*

- Clear and simple touch voting
- Integrated with paperless agenda packet
- Convenient tablet mobility
- Request to speak functionality
- Real-time results on public displays

### Convenient Tablet Voting

*A zero learning-curve approach to faster, smarter voting.*

- Easy one-touch voting
- Real-time meeting synchronizing
- Paperless exploration of voting item details, text, and history
- Intuitive design for hassle-free deployment and implementation

### Streamline the Meeting Process

*Keep track & stay organized with a realtime data flow that keeps iLegislate in sync & simplifies minutes creation.*

- Maintain perfect voting accuracy
- Track meeting progress as it occurs
- Request to speak functionality & management
- Review detailed snapshot of item status, speaker queue, motion, mover, seconder
- Instantly send vote tabulations to digital meeting minutes & public displays

Traditional methods of recording votes can be cumbersome for legislative staff, oftentimes slowing the pace of public meetings. As part of the Granicus Meeting Efficiency toolset, iLegislate® + VoteCast™ on the iPad and Android devices modernizes the voting process by eliminating the tedium of hand counting, paper voting, and the use of outdated standalone systems.
