

Granicus AppStore

Centralized management of government cloud solutions

Inside the Granicus AppStore, discover a growing list of digital government solutions and a revolutionary way to manage all of your apps while simplifying the procurement process. Select from dozens of industry leading cloud-based applications focused on public sector needs, and use the Granicus platform to manage implementation, users, security roles, and passwords for all of your apps.

- Easily discover new solutions for improving your community
- Select critically acclaimed apps from over a dozen trusted vendors
- Use only one purchasing contract for all purchases
- Manage security and user roles for all apps in one place

The screenshot shows the Granicus AppStore website. At the top, there is a navigation bar with links for "Granicus AppStore", "Browse Apps", "My Apps", "Reports", and "Documentation". On the right side of the navigation bar is the "granicus labs" logo. Below the navigation bar is a dark teal header with the text "Granicus AppStore" in white. The main content area features four app cards, each with an icon, a title, and a brief description:

- SPEAKUP**: Crowdsourcing platform for government.
- CITY ACCESS**: City Access, enables cities to increase citizen engagement by connecting citizens with their elected officials, sharing information on
- SEECCLICKFIX HOSTED CRM**: SeeClickFix is a comprehensive CRM and citizen engagement platform. Launched in 2008, SeeClickFix now works with hundreds
- MEASURED VOICE**: The only social media management tool designed for government.

Granicus AppStore

Here are some of the powerful apps we offer:

SeeClickFix

From reporting potholes to receiving alerts, enable your community with this award winning 311 management app.

OpenGov

Advanced financial transparency that enables government officials and citizens to easily access revenue and budgets.

ReCollect

Communicate collection schedules and educate residents on solid waste and recycling related services offered by your community.

SpeakUp

Productive community engagement and crowdsourcing platform that helps turn citizen ideas and feedback into better results.

...and many more!

Centralized solution discovery

As government agencies open up data, the number of software developers finding great ways to use that data is multiplying. The Granicus AppStore puts the best of those solutions in one convenient place, cutting down on research time, and even inspiring new ways to improve your community.

Centralized user management

With the Granicus platform, manage user accounts, security roles, and passwords for all of your AppStore applications in one place. Users don't need to create separate user accounts for each solution; their existing credentials are used to automatically log them into their installed applications.

Simplified procurement

With so many solutions coming from different vendors, consolidating purchases under a single contract with Granicus, vastly reduces the time between the decision to purchase and implementation. If you're already a Granicus customer, you can even use your existing purchasing contract. See it, get it.

Proven solutions, trusted vendors

Each solution found in the AppStore has been vetted with rigorous testing, and real-world use by other government agencies. The solutions are critically acclaimed and often award winners, such as SeeClickFix, the sensational solution for citizens to report non-emergency neighborhood issues on their mobile devices.

Feature List

- Growing catalogue of critically acclaimed and award-winning digital government solutions
- Install/uninstall applications directly from the Granicus platform
- Administrators control which users can launch an application
- Single sign-on from the Granicus platform to partner applications
- Clear and concise monthly billing reports show customer what's installed and how much it costs them

How it works...

1

Sign up for a Granicus AppStore Account

If you're already a Granicus customer, jump right in and use your current purchasing contract with us to create a credit pool so you can select whatever you like from the AppStore whenever you're ready. Otherwise, talk to a Granicus representative to set up your account: call (877) 889-5495, or visit www.granicus.com/contact.

2

Discover and Select

Browse the growing catalogue of apps to discover the perfect solution. Select with confidence as all apps in the store have gone through a rigorous vetting process. All it takes is a click, and you've just bypassed the most tedious parts of the procurement process.

3

Deploy

Once you've selected your solution, just click 'Install'! Most apps are one-click deployment. In the case of some larger apps, the vendor will connect with you to assist in finishing the deployment process.
